

# LinkedIn Integration Setup Guide for AgroVentia Inc.

---

**Date:** January 05, 2026 **To:** AgroVentia Inc. Management **Subject:** Steps to Generate LinkedIn API Credentials

---

## 1. Overview

To enable the "One-Click Publish" feature on the AgroVentia website, we need to connect the website to your official LinkedIn Company Page. This requires creating a "LinkedIn App" within your account to generate secure keys.

This process involves **3 main steps**:

1. Creating the App.
2. Verifying the Company Page.
3. Sharing the Credentials with the Development Team.

**Prerequisite:** Ensure you are logged into the LinkedIn account that is an **Admin** of the AgroVentia Company Page.

---

## 2. Step-by-Step Instructions

### Step A: Create the App

1. Go to the **LinkedIn Developer Portal**: <https://www.linkedin.com/developers/apps/new>
2. Fill in the form:
  - **App Name:** AgroVentia Website Connect (or similar).
  - **LinkedIn Page:** Paste the URL of your company page (e.g., <https://www.linkedin.com/company/agroventia-inc>).
  - **Privacy Policy URL:** <https://www.linkedin.com/company/agroventia-inc> (or your website's policy).
  - **App Logo:** Upload the AgroVentia logo (Square, 100x100px).
3. Check the **"Legal Agreement"** box and click **Create App**.

### Step B: Request Verification

1. Once the app is created, go to the **Settings** tab.
2. Under **"Company Page"**, click **Verify**.
3. Click **Generate URL**.
4. **Copy the URL** provided and open it in a new browser tab.
5. Click **"Verify"** on that page to confirm you own the AgroVentia page.

### Step C: Add Products (Critical)

1. Go to the **Products** tab in your new App.
2. Request access for the following two products:
  - **Share on LinkedIn** (Required for posting).

- **Sign In with LinkedIn using OpenID Connect** (Required for logging in).
3. These usually approve instantly.

Step D: Configure Redirect URL

1. Go to the **Auth** tab.
2. Scroll down to **"OAuth 2.0 settings"**.
3. Click the pencil icon/edit next to **"Authorized redirect URLs for your app"**.
4. Click **+ Add redirect URL**.
5. Add the following URLs (add both):
  - <https://www.agroventia.ca/api/auth/linkedin/callback> (Primary / Production)
  - <http://localhost:3000/api/auth/linkedin/callback> (Dev / Testing)

Step E: Extract Credentials

1. Still in the **Auth** tab, look at the top section named **"Application credentials"**.
2. Find the **Client ID** (a long string of letters and numbers).
3. Find the **Client Secret** (Click the "eye" icon to reveal it).

---

### 3. Information Required by Developer

Please securely copy the two values found in **Step E** and send them to your development team.

| Field                  | Value                      |
|------------------------|----------------------------|
| LINKEDIN_CLIENT_ID     | [Paste Client ID Here]     |
| LINKEDIN_CLIENT_SECRET | [Paste Client Secret Here] |

**Security Warning:** Do not share the "Client Secret" in public chats or unencrypted emails if possible. It allows access to post on your company's behalf.
